

**3 + 2 layer of the aether.
Theoretical build up of the aether. [to be revised]**

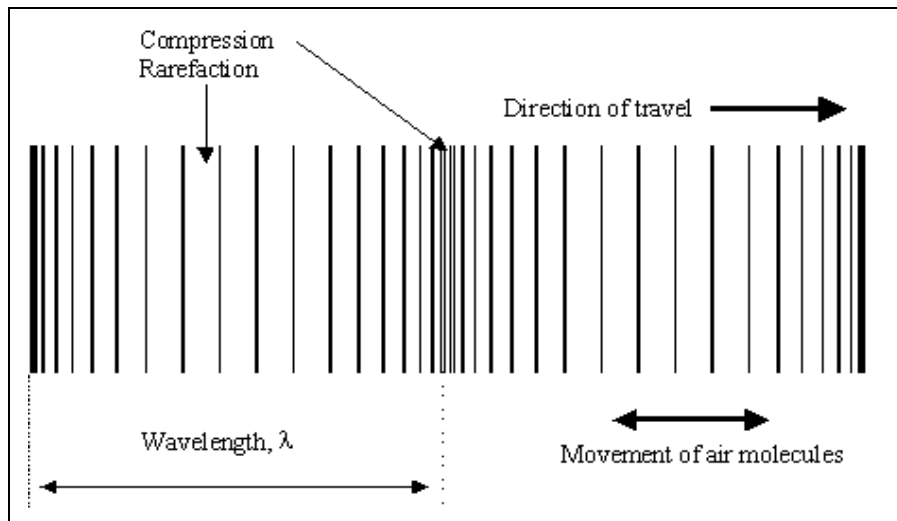

First of all, there are 3 basic types of waves in physics that we know of:

● **Transverse wave**

Reference: <http://www.antonine-education.co.uk/>

● **Longitudinal wave**

Reference: <http://www.antonine-education.co.uk/>

● **Torsional spiral wave (RAD)**

Reference: <http://www.marinediesels.info/>

These 3 type of wave types basically determine our every day life. However, a type of wave effect called soliton is unique among all wave tapes. A soliton is a self reinforcing wave that can exist, grow and contain more over time just like a carrier wave. If our Lord is made up of solitons, than I wish it have as much content and power as it can have and no enemies.

As an example of the torsion wave in 3 dimensional space, people without other reason or goal, tend to converge North and East in General.

If you think about it, in a 3 dimensional space, if you have no fixation point of inertia system, than you will be simply going with the law of the torsional wave and most likely, your events will be determined by this wave just like when you pull the plug of a sink, the water forms a whorl because in 3 dimensional space, the water has no fixation points or a holding frame if

you like. That would make the water flow down in a more linear way. It is an interesting study, how such torsional waves (RAD) can affect processes if you consider that the matter operates at 10^{44} Hz in the pure sea of qulomb charge. This means that, if one's body can be considered an RFID chip in 3D space and the matter operates at 10^{44} Hz by a study, then pattern matching, aka convergence in such a space can occur fairly quickly.

An RFID chip

A zoomed in RFID chip

As a result, people too, need frame in their life to base their life on. This is why religion is a powerful thing. A religion can be most important foundation in one's life that one can place all action and reason of existence in life. Imagine a set of rules and explanation that can hold you in any situation. Wouldn't it be good or does something already exist like that? Not easy I guess. One says. "Life is a lesson, you learn it when you through"

If you observe the spread out of the cities for example, you can see that most wealth and intellectual property tend to end up in the northern and western areas of a city. There is even a song track about it written by the famous Pet Shop Boys. Eastern girls and Western boys, Go West etc. How funny or ironic is this.

I originally started thinking about convergence in 2003 when I purchased Field technology I from Dr. George Egely. The book precisely introduced the subject of the famous Casimir effect. In about 2005, I discovered the famous book called The Secret written by Rhonda Byrne that is also very similar to what the Casimir effect describes in terms of waves and soliton pulses, ISBN: 1582701709

If we think about religions in the world, then we can find some very creative and positive knowledge and wisdom but still Buddhism, for example exposes a person as the founder or leader of a group of people no matter how good the foundation of the religion was laid down. I am aware that kings and presidents exist to represent a nation or group of people, yet, I think that such pressure and tie can be released by placing a universal thing in the center of a system frame such as religion that can not be exposed or abused. And let the religion be based on a knowledge, wisdom and rules that people have gathered over the years. Such frames of groups are Tao and Islam for example. Tao teaches how things work and does not expose any entity, it bases its teachings on the rules of the world but there is no central entity on which around it is based, hence the symbol:

Reference: <http://www.lri.fr/>

The symbol obviously symbolizes the balance of two fighting forces in the world based on a set of rules but there is no unity, there are only rules.

Islam, however does unite its foundation in something and that is the Kaaba stone in Mecca, Saudi Arabia.

Reference: <http://geekisiddiqui.wordpress.com/>

Hence I dare to question that Islam could be the most advanced religion among all. I obviously do not want to paint the fence with the same colour but I consider it a good food for thought for myself at least.

A theory about creation at first place:

A drop of water into still water. So the absolute flat and rigid energy field due to perfect balance I guess, was broken up by a wave from somewhere. Such effects can happen in physics called bifurcation for example. The point is that the system simply “slips”. No matter how perfect the world is, a single “error”, no matter how tiny it is, could have broken up the perfect stillness of the World. Internal pressure or anything can cause such a thing in physics. Once there is dynamism in the wave system basically, then interference and hence, creation can occur.

Please note, that creation almost always emerges from the interference of 2 or more different things in the World as Tao says too. Once there is creation, it folds into a never-ending process. Since who can rule the vibrant existence of the world, not even the Lord.

How things work ?

● Execution of tasks

1. Iteration
Tasks executed one after another.
2. Repetition
Repeating the same task over and over again.
3. Selection
Making a decision, a branch.

When load is high

1. Working harder 🥵
2. Working smarter 🧠
3. Getting help 💡

Reference: In Search of Clusters by Gregory Pfister, ISBN: 0138997098

Distributed evolution

The same pattern can occur at 2 or more places according to evolution. Hence, there is proof that evolution is distributed. If it is true, then we have chances that other civilizations exist in outer space.

The religion of the system

Exposition.

People vs solitons of the system, matter, or as you like in the Religion of Islam, The Kaaba stone or matter itself if you like, a solid state of common existence rather than a changing entity. I believe in the system, therefore I am in the system. I abide by its rules, therefore the system supports me. I trust police, I trust my government, my car's manufacturer that it built a safe and comfortable car that I can use with the ones I belong to and even more. If I have a problem with my subscribed service such as my mobile phone provider, I call customer support and I will receive help. Because I paid my bills and I am a registered customer of the communications company. If I am in another country and I get in trouble, my country's embassy will help me to get home. There is no limit. This is the religion of the system which is built on a foundation called a religion or faith if you like. System is the power.

Similar to the Matrix movie. You feel this when you pay your bills, you go to church, you report to an organization and so on. I act on behalf of the system, a system that does not tie me but allows me to explore my limits as well as provide shelter against the extreme conditions of out of the system conditions such as being unemployed or not having a citizenship.

Not too complicated I guess, the most shocking discoveries are almost always so simple that you do not believe in it at first. Why is this? You simply face truth and you can not see it because there is no dirt or image in it to be differentiated from...This is another reason why modern model agencies have preference for woman with a type of error in them, something that creates an image of self.

If you have no properties, then it is difficult to be differentiated or known.

I guess we all differ in some way and that is the good way.

The 3 + 2 layer model of the World:

2. Heaven. Where angels supposed to exist I guess and God is the Lord of this space.

1. Hell. Where rats and other animals rule space including the devil itself. This is the opposite of life. Cold, no dynamics, silence and darkness. This is where suppression occurs that makes the creatures of hell like a mad kid.

3. Processes. A dimension in which space is made up of processes. It is the interdependency of the processes that is most important in this space. In other words, care and love about anything that has an entity or can be called on a name.

2. Events. A dimension in which space is made up of system of events.

1. Vacuum in which mass flows and exists. This layer is also known as Dirac sea, Higgs field or Delta-E field if you like. This pure flow of qulomb charges in which matter operate on 10^{44} Hz anf flows or hangs basically in this sea of pure qulomb charge. Similar to how Earth for example is hanging in space which is actually pure sea of qulomb charge. According to a study it also have distributive significance as a base of quiton/perceptron physics as a transfer layer.

Reference: Prof. Konstantin Meyl, IEEE publication

Each matter or energy chunk can be considered an entity. Each of these entities form a process which can interact harmonically or dynamically with one another also studied by quiton/perceptron physics. However, please note that Hell and Heaven is a division for the Lord, that is why true Lord can exist in any part of the World at any time since the ultimate solution to a superior being is soliton. And a soliton does not know limits. As a result, the Lord is capable of shading light into Hell and burning up the cold of Hell for a better united World. All parts of the document are freely disputable.

*It is an interesting hypothetical question for thought, weather Hell and Heaven could be magnetic components in their nature, of layer 1,2, and 3.
